The sound ratings shown are loudness values in spherical sones at a distance of 1.5 m (5 ft) in a hemispherical free field calculated per AMCA Standard 301. Values shown are for: Installation Type D: ducted outlet spherical sone levels. Ratings do not include the effect of duct end correction.

The HVI certified ratings program does not provide for sound ratings of inline fans, so these values are not HVI certified.

AMCA does have a program for testing and rating sound for inline fans but Air King is not an AMCA member so these values are not AMCA licensed. The testing was performed at the AMCA laboratory in Arlington Heights, IL. The outlet duct length was 18" (3 duct diameters) of galvanized steel duct with no acoustic insulation with a bell mouth termination fitting.
