→ INTRODUCTION

The power plug provides connections for 230-v power supplied to indoor fan coil for those applications without electric heat.

NOTE: The power plug is required on all fan coil units installed without electric heat. Consult pre-sale literature to identify units not shipped with a power plug.

The power plug is NOT needed for those applications with electric heat.

→ DESCRIPTION AND USAGE

The power plug kit is needed to supply 230-v power to FA, FB, FC, FH, FK, FX, FV, and PF fan coil units installed without electric heat. Those applications which use electric heat packages have 230-v power connections included as part of the electric heat packs.

INSTALLATION

PROCEDURE 1—INSTALL ACCESSORY ASSEMBLY

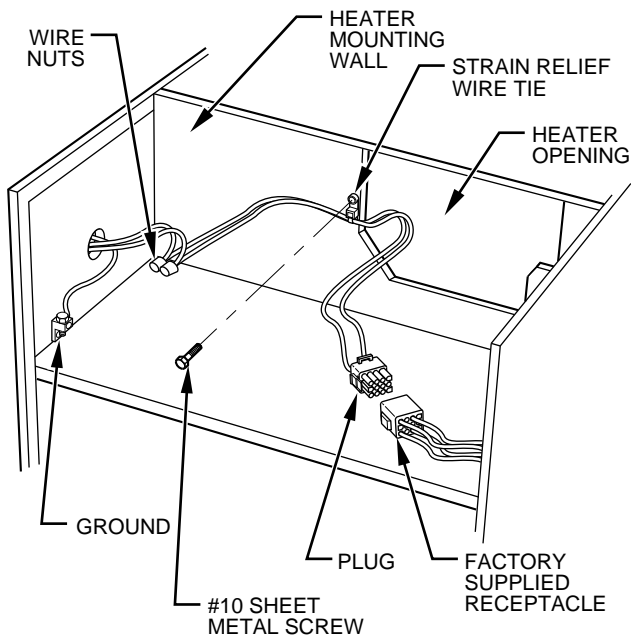

1. Make sure power to unit is off.
2. Remove front access panel of fan coil unit.
