- Adjustable from 14”-24”
- 20 ft. cable
- Integrated locking hook

TECHNICIAN INVENTED. TECHNICIAN PROVEN.

The Attic PRO was invented by a real HVAC technician who was also a fireman. As a one-man operation, he was looking for a way to help lift furnaces and air handlers up into attics. One day on a training exercise, he used a winch to pull a person out of a man-hole - and the Attic PRO idea was born.
