extension battery
and cable

Will Not Turn On

- ✓ Is this your first time using a jet gun?

If yes, you need to prime the battery. The jet gun requires the first use to prime the battery, after this is complete the product will work immediately upon additional uses. To prime the battery, first, fully charge the battery. The charger has an LED light that is red or green. Red light means the battery is not fully charged. Green light means the battery is fully charged. Once fully charged, turn the jet gun on. You will hear a buzz sound coming from the motor. Leave the jet gun in the ON position until the buzz sound drops off into a low hum. At this point the product is ready to use. Priming your battery may take up to 45min, standard is 5-10min.

- ✓ Check charger.

Verify jet gun is charged: When jet gun is plugged in to charger and fully charged the LED light will be green. If it never turns green, there is an issue with the charger itself and needs to be replaced.

Replacement part #: PW1008.01

If neither of these is your issue, please call (434)-400-8718 for additional assistance.

Leaking

Where is the jet gun leaking from?

✓ Nozzle

Ensure the nozzle is attached properly to the coupler. If the nozzle, gaskets, or coupler is broken, replace.

Replacement part #: RP1067.01 (nozzle)

Replacement part #: RG9014.05 (gaskets)

Replacement part #: RV6037.01 (coupler)

✓ Bladder

Bladder is recommended to fill $\frac{3}{4}$ of the way full of liquid.

Check the bladder bag lid. Verify the circle lid attachment is pushed all the way down each lip level to close tightly and securely.

Replacement part #: FL1100.01

Check the couplers at the end of the hose on the bladder. If there are cracks or the release on the coupler is not working properly, replace it.

Replacement part #: RV6039.01 (female coupler)

Replacement part #: RV6038.01 (male coupler)

✓ Bottom of the jet gun bag

Check Bladder section as suggested above.

Open zipper around lid of jet gun. Remove top off Styrofoam. Turn on jet gun and watch if the elbow is leaking. **BE CAREFUL:** it will spray if this is the location of the leak.

Please call (434)-400-8718 for assistance.

Bubble In House

If there is a bubble in your hose or it is leaking, replace it with the following part.

Replacement part #: TB1025.01

Replacement Parts List

PW1007.01: Extension battery

PW1008.01: Battery charger

FL1100.01: Jet gun bladder

RP1067.01: Nozzle for spray gun

RP1068.01: Wand attachment

RV6039.01: Female coupler for bag connection

RV6037.01: Female coupler for jet gun hose

RV6038.01: Male coupler for bag connection

Replacement Parts List Continued

RG9014.05: Gasket for spray gun

TB1025.01: Black PVC hose

If you have tried the various troubleshooting tips and still need additional assistance, please call (434) 400-8718.
