ERVXXSHA1130, ERVXXSVA1130
Performance™ Fresh Air Systems – 130 CFM

Carrier
Turn to the experts

Product Data

A200611

- 35 to 131 CFM (17 to 62 L/s) @ 0.2 in. w.g.
- 35 to 119 CFM (17 to 56 L/s) @ 0.4 in. w.g.

Advanced residential fresh air system, created to offer a universal platform specifically designed for quick and easy installation while delivering constant fresh air to the home.

- Airflow calibration and auto-balancing are achieved quickly and maintained throughout the life of the product
- Select the desired CFM (35 to 131 CFM [17 to 62 L/s]) using the proven integrated LCD screen. The airflow is then set up automatically
- Integrated electronic airflow measurement device with real time LCD
- Integrated diagnostic tool
- PMSM ECM motors for very low power consumption
- Recirculate air within the dwelling with recirculation mode using a main wall control (use with setup T-1, T-2 and T-3 only)
- Suspended installation (chains included)
  OR
- Wall-mount installation (universal brackets included)
  – installation with 2 brackets or 4 brackets

CORE

- Polypropylene crossflow core with polymeric membrane and aluminum covers, impact resistant, non washable
- Dimensions: 12" x 12" x 9" (30.5 cm x 30.5 cm x 23 cm)

FILTERS

- MERV 8 grade washable standard filter (included)
- Optional MERV13 grade filter part no. SV24285

OPTIONS

- Compatible with the Tandem transition (part no. KVAAC0101HCO) (recommended for units producing up to 110 CFM [52 L/s] only)

UNIT DESCRIPTION

- SRE of 67% at 0°C and 56% at -25°C (66 CFM [31 L/s])
- Ports size: 5 in.
- Recirculation Mode and Recirculation Defrost
- Corrosion resistant galvanized cabinet
- One-piece molded insulation shell, no air leakage (expanded polystyrene; UL 94 HF-1 certified)
- Constant airflow and auto-balancing device
- Motorized dampers (no additional backdraft dampers required)
- No drain required
- 120V, 60 Hz, 2.4 A, 110 W with 6 foot power cord

c UL us LISTED — Made in CANADA Fabriqué au — ® 2100 HVI CERTIFIED

A200636A

CONTROLS

NOTE: Do not connect the Infinity® System Control directly to the ventilator, as that may cause damage. If you have an Infinity® System Control use one of the optional Main Wall Controls.

If you want the Infinity® System Control to control the ventilator, then you must use a NIM (Network Interface Module) P/N SYSTXCCNIM01 and a Translator Board P/N SYSTXXXTRB01 in order for the System Control to communicate properly. If using the Infinity® Zoning Panel P/N SYSTXCC4ZC01 with the ventilators you must use the Translator Board to communicate between the Zoning Panel and the ventilator. See Table 2 for NIM and TRB requirements for newest ERV and HRV models. See the Installation Manual for wiring diagrams.

Please do not connect the Network Interface Module (NIM) or the Infinity® Zoning Panel to the two terminal blocks on the new ventilator. The new ventilator terminals do not match up to the NIM or Infinity® Zoning Panel terminals. Connecting the two controls may cause damage.

A200612CA

There are 4 optional main controls and 1 optional auxiliary control available (Table 1). Refer to the applicable Wall Control specification sheet for more information.

NOTE: These controls are compatible only with the latest versions of ERV and HRV ventilators. Older controls will not work with the newest ventilators.

Manufacturer reserves the right to change, at any time, specifications and designs without notice and without obligations.

Table 1 – Controls

Control Name	Description of Modes	Model #
Premium	Touch Screen, Auto 2.0 Fully Configurable, Multiple Modes	KVACN0101CPC
Automatic	Auto 1.0, Filter Alert	KVACN0101CAC
Dehumidistat	Humidity Sensor / Selection	KVACN0101CDH
Speed Selector	5 Operating Time Periods	KVACN0101CSS
AuxiliaryBathroom Override	20 - 40 - 60 min. Settings	KVACN0101CBO

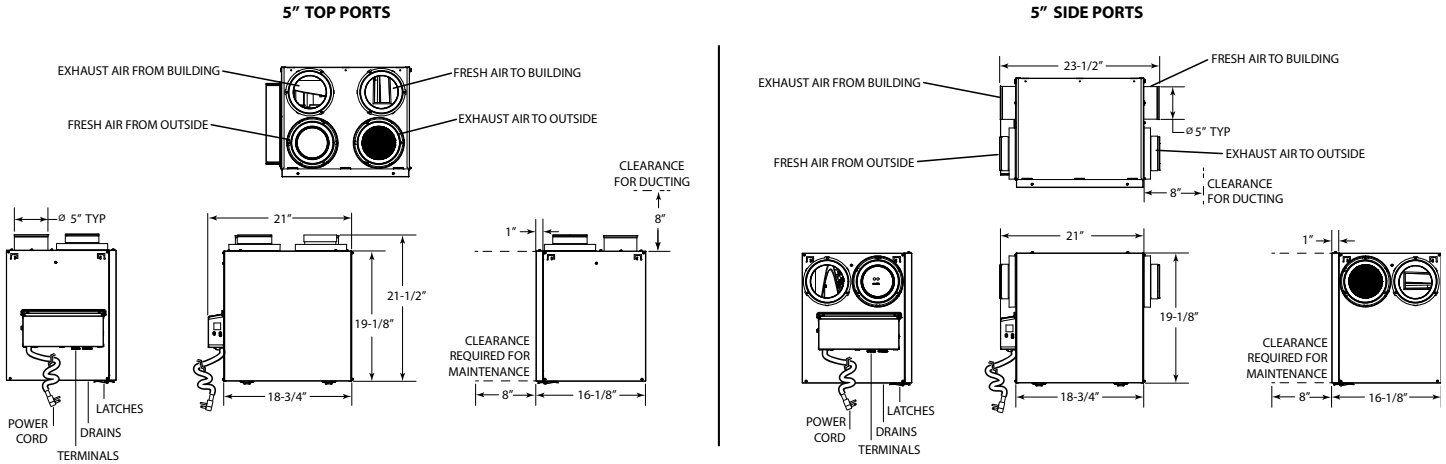
DIMENSIONS

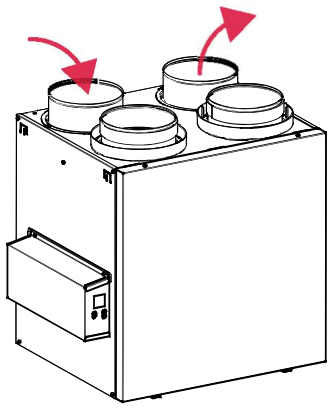


A200613A

- Total assembled weight (core included) - approx 37 lb. (16.8 kg)
- Shipping weight - approx 44 lb. (20 kg)

DEFROST SYSTEM

No negative pressure is created by air exhausted to the outdoors since the air is recirculated into the house, helping to prevent any backdraft. Defrost is activated at a temperature of -5°C (23°F) and lower as specified. See Table 3.



A200615

Table 3 – Defrost Settings

FACTORY SETTING	OUTDOOR TEMPERATURE*					
	-5°C TO -15°C / 23°F TO 5°F		-15°C TO -27°C / 5°F TO -17°F		-27°C AND LESS / -17°F AND LESS	
CFM	AIR EXCHANGE IN MINUTES	DEFROST IN MINUTES	AIR EXCHANGE IN MINUTES	DEFROST IN MINUTES	AIR EXCHANGE IN MINUTES	DEFROST IN MINUTES
0 to 59	30	5	18	5	17	8
60 to 90	40	5	21	5	21	8
91 and more	20	5	15	5	15	8
PLUS	**OUTDOOR TEMPERATURE***					
	-5°C TO -15°C / 3°F TO 5°F		-15°C TO -27°C / 5°F TO -17°F		-27°C AND LESS / -17°F AND LESS	
CFM	AIR EXCHANGE IN MINUTES	DEFROST IN MINUTES	AIR EXCHANGE IN MINUTES	DEFROST IN MINUTES	AIR EXCHANGE IN MINUTES	DEFROST IN MINUTES
0 to 59	24	7	14	7	14	10
60 to 90	30	7	16	7	15	10
91 and more	18	7	12	7	12	10
*Outdoor temperature is read by a thermistor located inside the unit, next to fresh air from outdoor port.						

FAN CURVES

Thanks to new technology, no need to balance the unit manually. Both PMSM motors are controlled by an artificial intelligence performing 120 readings per minute then processing this information to maintain the requested airflow.

For typical installation, the software will ensure a balanced ventilation at every selected speed regardless of the weather conditions, the type of connection, the variable speed furnace/AHU, the stack effect, the filter clogging and so on. This results in peace of mind for installers and users knowing that the unit is designed to remain balanced and maintain heat/energy recovery efficiency.

NOTE: Fan curve is not certified by HVI.

REQUIREMENTS AND STANDARDS

- Meets UL 1812 (safety)
- Meets CSA C22.2 No. 113 (safety)
- Could be installed to CSA F326
- Performance tested in accordance with CSA C439 Standard
- Meets Prop 65
