Advanced Electrode Humidifier

Your home in perfect balance

Balanced humidity for a home that's well

When your home's humidity levels are out of balance, you, your family and your pets may experience the irritating effects of air that is too dry, including itchy skin, scratchy throats, chapped lips, static electricity and unpleasant shocks. Additionally, your woodwork, hardwood floors and favorite possessions, like furniture, artwork and musical instruments, may crack and split.

The Advanced Electrode Humidifier can help you feel more comfortable throughout your whole home by maintaining the right humidity levels for you, so your home—and everything in it—can be well.

Efficient, connected and easy.

More effective than traditional evaporative humidifiers, the Advanced Electrode Humidifier is:

Efficient

- Reaches an ideal humidity level quickly and consistently with on-demand humidification.
- Can help you reduce your heating bills, since proper humidity levels make homes feel warmer.
- Is one of the market's smallest steam humidifiers; installs directly into central heating and cooling systems.

Connected

- Works with multiple Honeywell Home thermostats; offers digital control with the Total Connect Comfort or Honeywell Home App.
- Comes with a HumidiPRO™ digital humidity control, which automatically adjusts to preferred humidity levels; protects against window condensation and frost.
- Works with HumidiPRO's Humidity Boost for on-demand changes at the touch of a button.

Easy

- Fills automatically, taking the hassle out of handling clunky water tanks.
- Contains an easy-to-access, easy-to-replace canister for simple maintenance.
- Automatically adapts to changing water conditions.
- Indicator lights show status and assist with diagnostics.
- Quiet Operation—so you'll only know it's working by how comfortable you feel.
