

PICK UP PORTS

Stainless Wall Plates

The wall mounted stainless plate pickup ports are designed to be used in conjunction with any low differential pressure transmitter (see ACI DLP or MLP Series) to provide an aesthetically pleasing building static reference point (pressure). When used in conjunction with a low differential pressure transmitter, the pickup ports provide excellent accuracy and reliability. ACI also offers 10', 20' and 100' Medical tubing kits made of an FDA approved Food/Medical Grade Flexible PVC tubing kit. For best results, make sure that the tubing is free of dirt, dust and condensation and that you keep the tubing run as short as possible to provide the best response time. For more information regarding the Medical Grade Tubing kit, please see the specific data sheet for the Medical Grade tubing kit.

Applications: Monitoring Indoor Building Static Pressure in Commercial/Office Buildings, Clean Rooms, Isolation Rooms, Hospitals, Laboratories, Schools, etc.

The Pick Up Port Series is covered by ACI's Five (5) Year Limited Warranty. The warranty can be found in the front of ACI's Sensors & Transmitters catalog, as well as on ACI's website, www.workaci.com.
