26VNA1 Infinity®
Variable Speed Air Conditioner
with Greenspeed® Intelligence
and Puron Advance™ (R-454B) Refrigerant
2 to 5 Nominal Tons

Carrier

PRODUCT DATA

Carrier's 26VNA1 with Greenspeed™ Intelligence is a variable speed cooling product providing up to 21 SEER2 cooling efficiency. Lower speed operation is available when needed in cooling, for enhanced comfort and dehumidification.

Refer to the AHRI directory (www.ahridirectory.org) for the most up-to-date ratings information.

Industry leading Features / Benefits

Energy Efficiency
- Up to 21 SEER2, 12 EER2
- Microtube technology™ refrigeration system
- Indoor air quality accessories available

Sound
- Sound level as low as 55 dBA in low speed

Comfort
- Variable speed compressor with capacity range from 25-100%
- Air cooled variable speed drive
  - Infinity® System Control with Greenspeed™ Intelligence required.
  - Energy Tracking capability with the Infinity® System Control and latest software version (Energy Tracking has the ability to monitor and estimate the energy consumption of your Infinity® system.)

Reliability
- Non-ozone depleting, low global warming potential Puron Advance™ refrigerant
- Front-seating service valves
- Greenspeed™ Intelligence actively monitors critical system parameters
- High pressure switch
- Discharge and suction pressure transducer
- Filter drier (field installed)
- Internal stator heating function standard

Flexibility and Installation:
- Vertex™ Technology compatible
- 2 control wires to outdoor unit
- Minimum and maximum airflow adjustments
- Efficiency and comfort modes

Durability
WeatherArmor Ultra™ Protection Package:
- Solid, durable sheet metal construction
- Steel louver coil guard
- Baked-on, complete outer coverage, powder paint

Applications
- Cooling mode operation up to 125°F (51.7°C) outdoor ambient temperature.
- Long-line - up to 200 feet (61.0 m) equivalent length, up to 100 feet (30.5 m) condenser above evaporator, or up to 80 ft. (24.4 m) evaporator above condenser (See Long Line Guide for more information.)
- Low ambient cooling down to 0°F (-17.8°C) when enabled in Infinity® System Control.

AHRI RATINGS

For AHRI ratings certificates, please refer to the AHRI directory www.ahridirectory.org
Additional ratings and system combinations can be accessed via the Ratings Database here: www.MyCarrierRatings.com

NOTE: Ratings are subject to change at any time.

MIN/MAX Airflow Tables

The indoor airflow delivered by this system varies significantly based on outdoor temperature, indoor unit combination, and system demand. The airflows on these tables are for duct design considerations.

Duct systems capable of these ranges will ensure the system will deliver full capacity at all outdoor temperatures. Minimum and maximum airflows can be adjusted from these numbers in the Infinity®System Control Air Conditioner Setup screen.

Size	Cooling - Comfort Mode		Cooling - Efficiency Mode	
	Max Airflow	Min Airflow	Max Airflow	Min Airflow
24	770	300	770	485
36	1050	400	1150	500
48	1200	600	1350	700
60	1400	600	1625	785

36				25	12.7	0.88	22.9	25	5kA rms
48				25	17.9	0.88	30.6	40	5kA rms
60				35	23.7	0.88	36.9	50	5kA rms

*. Permissible limits of the voltage range at which the unit will operate satisfactorily
†. Time-Delay fuse.
FLA - Full Load Amps
MCA - Minimum Circuit Amps
MRC - Maximum Rated Current
RLA - Rated Load Amps
SCCR - Short-Circuit Current Rating
NOTE: Control circuit is 24-V on all units and requires external power source. Copper wire must be used from service disconnect to unit.
All motors/compressors contain internal overload protection.

Refrigerant Piping Length Limitations

Maximum Line Lengths:

The maximum allowable equivalent length for air conditioners varies depending on the vertical separation. See the tables below for allowable lengths depending on whether the outdoor unit is on the same level, above or below the outdoor unit.

Maximum Line Lengths for Air Conditioner Applications

	MAXIMUM ACTUAL LENGTH ft (m)	MAXIMUM EQUIVALENT LENGTH* ft (m)	MAXIMUM VERTICAL SEPARATION ft (m)
Units on equal level	200 (61)	200 (61)	N/A
Outdoor unit ABOVE indoor unit	200 (61)	200 (61)	100 (30.5)
Outdoor unit BELOW indoor unit	200 (61)	200 (61)	80 (24.2)

*. Equivalent length accounts for losses due to elbows or fitting. See the Long Line Guideline for details.

Long Line Applications

An application is considered Long Line when the refrigerant level in the system requires the use of accessories to maintain acceptable refrigerant management for systems reliability. Defining a system as long line depends on the liquid line diameter, actual length of the tubing, and vertical separation between the indoor and outdoor units.

For air conditioning systems, the chart below shows when an application is considered Long Line. Beyond these lengths, long line accessories are required:

AC with Puron Advance™ (R-454B) Refrigerant Long Line Description ft (m)
Beyond these lengths, long line accessories are required

Liquid Line Size	Units On Same Level ft (m)	Outdoor Above Indoor ft (m)	Outdoor Below Indoor ft (m)
3/8	80 (24.4)	80 (24.4)	20 (6.1) vertical or 80 (24.4) total

NOTE: See Long Line Guideline for details

Liquid-Line Solenoid Valve	No	Yes	No
Low-Ambient Control	Standard with Infinity® System Control	No	No
Support Feet	Recommended	Recommended	Recommended
Winter Start Control	Standard with Infinity® System Control	No	No

Accessory Description and Usage

1. Liquid-Line Solenoid Valve (LLS)

An electrically operated shutoff valve which stops and starts refrigerant liquid flow in response to compressor operation. It is to be installed at the outdoor unit to control refrigerant off cycle migration in the OFF mode.

Usage Guideline:

A LLS is required in all long line applications to control refrigerant off cycle migration in the OFF mode. See Long Line Guideline.

Suggested for all commercial applications.

2. Sound Blanket (Accumulator)

Wraparound sound reducing cover for the accumulator. Reduces possible transient tones that may resonate in the accumulator due to variability in system operation.

Usage Guideline:

Although all units are designed and tested to eliminate unpleasant tones, in the unlikely event a transient tone is experienced, this sound blanket can reduce the tone by up to 10 dB.

3. Support Feet

Four or five stick-on plastic feet that raise the unit 4 in. (101.6 mm) above the mounting pad. This allows sand, dirt, and other debris to be flushed from the unit base, minimizing corrosion.

Usage Guideline:

Suggested in the following applications:

Coastal installations.

Windy areas or where debris is normally circulating.

Rooftop installations.

For improved sound ratings.

{ Total and sensible capacities are net capacities. Blower motor heat has been subtracted.

} Sensible capacities shown are based on 80_F (27_C) entering air at the indoor coil. For sensible capacities at other than 80_F (27_C), deduct 835 Btuh (245 kW) per 1000 CFM (480 L/S) of indoor coil air for each degree below 80_F (27_C), or add 835 Btuh (245 kW) per 1000 CFM (480 L/S) of indoor coil air per degree above 80_F (27_C).

** System kw is total of indoor and outdoor unit kilowatts.

Detailed cooling capacities are based on indoor and outdoor unit at the same elevation per AHRI standard 210/240-08. If additional tubing length and/or indoor unit is located above outdoor unit, a slight variation in capacity may occur.

NOTE: When the required data falls between the published data, interpolation may be performed. Extrapolation is not an acceptable practice.

Guide specifications
General

AIR-COOLED, SPLIT-SYSTEM AIR CONDITIONER
26VNA1
2 TO 5 NOMINAL TONS

System Description

Outdoor-mounted, air-cooled, split-system air conditioning unit suitable for ground or rooftop installation. Unit consists of a hermetic compressor, an air-cooled coil, forward-swept blade propeller-type condenser fan, and a control box. Unit will discharge supply air upward as shown on contract drawings. Unit will be used in a refrigeration circuit to match up to a packaged fan coil or furnace coil unit.

Quality Assurance

- Unit will be rated in accordance with the latest edition of AHRI Standard 240.
- Unit will be certified for capacity and efficiency, and listed in the latest AHRI directory.
- Unit construction will comply with latest edition of ASHRAE and with NEC.
- Unit will be constructed in accordance with CSA standards and will carry the CSA label of approval.
- Unit cabinet will be capable of withstanding Federal Test Method Standard No. 141 (Method 6061) 500-hr salt spray test.
- Air-cooled condenser coils are pressure tested and the outdoor units are leak tested.
- Unit constructed in ISO9001 approved facility.

Delivery, Storage, and Handling

- Unit will be shipped as single package only and is stored and handled per unit manufacturer's recommendations.

Warranty (for inclusion by specifying engineer)

- U.S. and Canada only.

PRODUCTS

Equipment

- Factory-assembled, single-piece, air-cooled air conditioner. Contained within the unit enclosure is all factory wiring, piping, controls, compressor, Puron Advance™ (R-454B) refrigerant charge, and special features required prior to field start-up.

Unit Cabinet

- Unit cabinet will be constructed of galvanized steel, bonderized and coated with a powder coat paint.

Fans

- Condenser fan will be direct-drive propeller type, forward swept blade, discharging air upward.
- Condenser fan motors will be totally enclosed, 1-phase DC type with class B insulation and permanently lubricated.
- Fan blades will be statically and dynamically balanced.
- Condenser fan openings will be equipped with coated steel wire safety guards.

Compressor

- Compressor will be hermetically sealed.
- Compressor will be mounted on rubber vibration isolators.
- Compressor will be covered with a sound absorbing blanket.

Condenser Coil

- Condenser coil will be air cooled.
- Coil will be constructed of aluminum fins mechanically bonded to copper or aluminum tubes which are then cleaned, dehydrated, and sealed.

Refrigeration Components

- Refrigeration circuit components will include liquid-line and vapor line front-seating shutoff valves with provisions for sweat or mechanical connections, system charge of Puron Advance™ (R-454B) refrigerant, PVE compressor oil, accumulator and pressure equalization valve.
- Unit will be equipped with high-pressure switch, suction and discharge pressure transducers, and field installed filter drier for Puron Advance™ (R-454B) refrigerant.

Operating Characteristics

- The capacity of the unit will meet or exceed _____ Btuh at a suction temperature of _____ _F (_C). The power consumption at full load will not exceed _____ kW.
- Combination of the unit and the evaporator or fan coil unit will have a total net cooling capacity of _____ Btuh or greater at conditions of _____ CFM entering air temperature at the evaporator at _____ _F (_C) wet bulb and _____ _F (_C) dry bulb, and air entering the unit at _____ _F (_C).
- The system will have a SEER2 of _____ Btuh/watt or greater at DOE conditions.

Electrical Requirements

- Nominal unit electrical characteristics will be _____ v, single phase, 60 hz. The unit will be capable of satisfactory operation within voltage limits of _____ v to _____ v.
- Unit electrical power will be single point connection.
- Control circuit will be 24v.

Special Features

- Refer to section of this literature identifying accessories and descriptions for specific features and available enhancements.
- Infinity® System Control with latest software version is required for full featured operation.

Manufacturer reserves the right to change, at any time, specifications and designs without notice and without obligations.

System Design Summary

1. System must be installed with factory approved R-454B Indoor unit only.
2. Factory authorized dissipation control board must be installed with indoor unit.
3. Intended for outdoor installation with free air inlet and outlet. Outdoor fan external static pressure available is less than 0.01-in. wc.
4. This product is qualified for low ambient cooling operation (below 55°F / 12.8°C) when enabled with an Infinity® System Control **ONLY**.
5. The maximum outdoor operating ambient in cooling mode is 125°F (51.7°C).
6. For reliable operation, unit must be level in all horizontal planes.
7. For interconnecting refrigerant tube lengths greater than 80 ft (23.4 m) and/or elevation differences between indoor and outdoor units greater than 20 ft (6.1 m), consult Residential Piping and Long Line Guideline and Service Manual available from equipment distributor.
8. If any refrigerant tubing is buried, provide a 6 in. (152.4 mm) vertical rise to the valve connections at the unit. Refrigerant tubing lengths up to 36 in. (914.4 mm) may be buried without further consideration. Do not bury refrigerant lines longer than 36 in. (914.4 mm).
9. Use only copper wire for electrical connection at unit. Aluminum and clad aluminum are not acceptable for the type of connector provided.
10. Do not apply capillary tube indoor coils to these units.
11. Factory-supplied filter drier must be installed.
