Comfy Max: Eliminate Overheating and Overcooling with True Thermostat Precision

Comfy Max turns Cielo Breez Max into a true smart thermostat for a mini-split. It uses AI-based algorithms to adjust the temperature setpoints, fan speed, and mode of the mini-split to maintain your desired room temperature, preventing overheating or overcooling. You just have to set your desired heating & cooling setpoints and Breez Max will take care of the rest.

CIELO LINKED

Integrated HVAC Controls for Sustainable Comfort

Cielo Linked is a cloud-based platform designed to maximize savings by pairing an existing air source heat pump with integrated controls and reducing reliance on fossil fuel-based heating systems.

Switch between HVAC systems based on outdoor weather conditions

Set automations based on indoor temperature or your personal preferences

Link multiple HVAC units, including mini-splits, central and AUX systems

Using Cielo Linked, users can:

- Link multiple HVAC units, including central or mini-split heat pumps and fossil fuel heating systems (furnace/boiler).
- Minimize the usage of fossil fuel heating (furnace/boiler).
- Maximize the utilization of central or mini-split heat pumps
