As an aid to removing a damaged Latch Assembly (9), use two large flat blade screwdrivers. Push blades between parts as shown. Twist both screwdrivers at same time to force the blades into opening and work the latch assembly over the two locking tabs.

To install a new latch assembly, position entire latch assembly over locking tabs with the two top lugs partially inserted in 'catch cavity' of main housing. Engage latch bar onto lid and gently press latch lever to slide assembly over two locking tabs and into place.

This removal and installation process will be the same where other service latches are offered in this system.

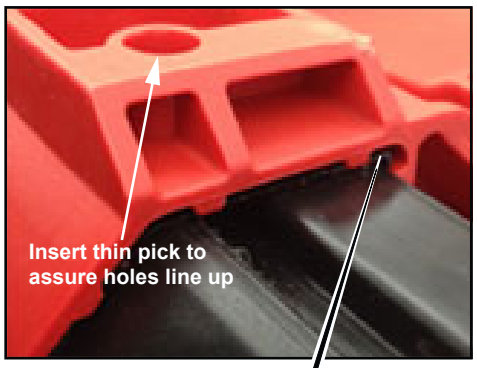
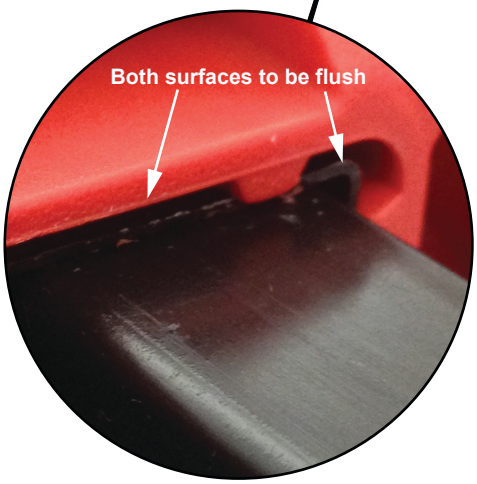
Drwg. 10





As an aid to installation, collapse the Retractable Handle Assembly (3).

Properly orient the assembly and insert both sides into tool box channels.

Holes of Retractable Handle Assembly (3) must line up with holes on the back of tool box body prior to securing with screws (4).
