Prior to installing Stator/Rotor Assemblies, place the Selector PCBA into the slotted Housing Support cavity. Press wires into channel as shown. Carefully place Stator/Rotor Assemblies into Housing Support, being sure all components are firmly and squarely seated.

Prior to installing the Gear Case Assembly, be sure all elements of the Electronics Assembly are seated properly (Stator, Main PCBA, Selector PCBA, On-Off Switch, LED Assembly and Battery Terminal Block Connector). Be sure the Grounding Terminal is in place and that all wires are pressed down into all wire traps and channels. Check to assure that wires will not interfere with moving parts.

Prior to installing the Housing Cover, place Forward/Reverse Shuttle onto On-Off Switch and through Housing Support opening. Check to assure that wires will not be pinched.

Secure the Housing Cover to the Housing Support with seven M3 x 16mm ST T-10 Screws. Be sure to replace the Housing Clip at the bottom of the battery opening.
