Great Wipes

NSF

Description

Great Wipes Industrial Strength Hand Towels are waterless wipes made specifically for the air conditioning, refrigeration, and plumbing service technician. Each premoistened, heavy duty towel has strong pumice scrubbing power that conveniently cleans anywhere and anytime.

Application

The powerful, yet safe, cleaning agents in Great Wipes work together with an absorbent, non-scratching abrasive hand towel. The result is hands that are clean and left residue-free with a pleasant orange fragrance. These shop size durable towels quickly absorb to remove substances, such as lubricant, grime, ink, tar, caulk, sealant paint, epoxy, adhesive, grease, urethane, and much more.

Great Wipes can also be used to degrease tools, tool boxes, equipment, work surfaces, metal, vinyl, painted surfaces, compressor parts, components, and more.

Directions for Use

Pull up Great Wipes and snap off along perforation. Open and unfold towel. Use the smooth side for small easy to remove messes and the textured side to remove heavy duty grime. Dispose of towel properly. Reseal container when not in use to ensure moisture retention. In colder climates, protect from freezing; however if they freeze, towels may still be used once they are thawed as the product is freeze/thaw stable.

Packaging

75 count bucket	**4185-75**

Read and understand the product's label and Safety Data Sheet ("SDS") for precautionary and first aid information.

The SDS is available on the Nu-Calgon website at www.nucalgon.com.
