Discover the endless possibilities of Carrier® Ductless & VRF products.

Fall 2015 Edition

Smart Comfort, Superior Performance

The wide array of Carrier® Ductless & VRF systems offer numerous solutions for spaces ranging from small residential rooms to large commercial applications. And, we stand behind them all with the trusted Carrier name.

THE POWER OF VARIABLE-SPEED

The variable-speed inverter-driven compressor for Ductless & VRF applications is the key component that gives Carrier® systems their superior performance, energy efficiency and quiet operation.

Energy-Efficient - Advanced inverter technology allows systems to achieve excellent energy efficiencies, **up to 30.5 SEER, 10.3 HSPF and 15.8 EER.**

Extreme Comfort Performance - Heating down to -22 degrees and cooling up to 130 degrees fahrenheit.

Personalized Comfort Control - Enjoy separate comfort settings from the rest of the home or building with individual remote control.

ENERGY STAR® - Select systems are ENERGY STAR certified in both heat pump and cooling-only systems.

Quiet Operation - Ideal for spaces where people spend large amounts of time and need low sound levels.

Environmentally Friendly - Washable filters on indoor units and the use of R410A refrigerant reduce harmful effects on the earth.

Heat Recovery & Heat Pump Commercial Line - VRF systems for commercial applications offer capacities for larger buildings with the flexibility of installation configurations.

Infinity® Series High Wall Ductless HIGH HEATING CAPACITY AT EXTREMELY LOW TEMPERATURES

TOSHIBA
Carrier

Carrier Can Take You Farther

With Carrier® Ductless & VRF Systems, there are even more innovative and flexible solutions that can be specifically tailored to meet your customers' needs.

WHY YOUR CUSTOMERS NEED A CARRIER DUCTLESS OR VRF SYSTEM

Whether your customers need air conditioning for a room that lacks the necessary ductwork or own a business that needs supplemental heating or cooling, Carrier Ductless & VRF systems offer smart solutions they're looking for. And that's only part of the reason to choose Carrier. We offer a superior level of service support and product training for every system, to stand behind our dealers and ensure the highest level of satisfaction for their customers.

Graphic represents a potential residential multi-zone system installation.

An Option for Every Situation

DOES THE SPACE HAVE A FLOOR, CEILING OR WALL?

Going ductless doesn't involve going through a major renovation. Fact is, there's very little mess at all. Nor does it mean sacrificing a room with a view to a bulky window unit. Instead, a ductless heat pump or air conditioner

integrates neatly into the space. It's mounted where it's least obtrusive — and most effective at quietly and gently directing treated air to every corner of the room.

VRF Heat Recovery and Heat Pump systems for commercial applications allow perfectly-matched, flexible solutions.

These are the perfect choice for large spaces where individual preferences or integrated building controls are necessary, like hospitals, nursing homes, education and office buildings, hotels or restaurants.

THEN CARRIER HAS THE RIGHT SYSTEM

Hot or cold rooms

Target those problem spots in a home or office that never seem to be comfortable enough with a ducted system alone.

Sunrooms or home additions

Carrier offers efficient residential ductless heat pump and AC systems that can be perfectly matched to keep a smaller add-on space comfortable all year.

Basements

Choose from high wall, underceiling or cassette indoor units to make a finished basement without adequate ductwork as comfortable as the rest of the home.

Strip mall retail spaces

Light commercial systems offer the power and flexibility when a business needs to be divided into smaller units or expand in size.

Larger commercial applications

Carrier VRF Heat Recovery and Heat Pump systems provide impressive flexibility with the ability to connect up to 40 indoor units to one outdoor unit. And they offer flexibility in piping configuration — up to 720 feet long and up to 130 feet high.

SERVICE
SUPPORT AND
PRODUCT
TRAINING

Carrier provides our family of dealers with excellent support and training programs to keep them well-informed and equipped to sell every system.

A Century of Innovation

Since 1902, Carrier has been the brand you've trusted for all your heating and cooling solutions. We've continued to make innovative products that meet the demands of tomorrow. Carrier's Ductless & VRF systems deliver efficiency, performance and control thanks to advanced INVERTER technology. When it comes to creating comfort, one size or system may not fit all, but one name does: **Carrier**.
