

Enables the PuriFi system to actively manage and communicate indoor air quality performance in real-time.

PuriFi Smart Hub

Immediately signals a response to changes in indoor air quality.

Designed for residential, commercial, and industrial applications, the PuriFi Smart Hub is part of the PuriFi intelligent air management system. When a change in indoor air quality is detected, the PuriFi PM Sensor notifies the PuriFi Smart Hub, and the patented PuriFi Generator is signaled to respond. The system operates to continuously purify indoor environments until the Sensor verifies that you have achieved your target air quality level. The Smart Hub then signals the Generator to enter standby mode, if your HVAC system is not actively operating.

The Smart Hub enables the patented PuriFi technology to monitor and manage the environment 24/7, working with the PuriFi Sensor, PuriFi Generator, and central HVAC system, while also communicating and proving PuriFi's performance on any smartphone, tablet, or voice assistant device.

Smart Hub Quick Facts

- Compact 2-7/8" x 2-7/8" x 5/8" hub design
- Compatible with Zigbee enabled smart home protocols and cloud-connected home automation devices
- Works with popular digital assistants including Amazon Alexa and Google Assistant
- Ethernet connection or WiFi repeater required for operation (not included)
- Network and power supply cables provided
- 2-Year Limited Warranty

PuriFi System Performance

- A whole-building air and surface purification technology
- Eliminates up to 99.99% of tested viruses, allergens, odors, and bacteria in occupied environments*
- Actively works with your central HVAC system
- Proprietary cold plasma technology uses natural, long-life ions to constantly treat the air and surfaces in the occupied space
- Provides 24/7 control of your indoor environment
