

# CLEAN AIR STRATEGY.

The air in our home may contain millions of particulates. Most of which are so small they are impossible to see. It takes a product, or several products, that can offer filtration, purification, and UV inactivation to provide great air quality.

**THE DUST FREE<sup>®</sup> ACTIVE AIR PURIFIER SUPPORTS ALL THREE LEVELS OF THE CLEAN AIR STRATEGY.**

**EPA Establishment No. 73316-TX-1**

Visit <http://www.dustfree.com/testing> for a list of microorganisms inactivated by Dust Free<sup>®</sup> products.

The product and technologies described are not medical devices, and are not intended to diagnose, treat, cure, or prevent any disease or illness.

The Dust Free<sup>®</sup> Active is available in 6" and 12" models.

## \* FILTRATION

Reduce dust, pollen, mold, and dander. The DF Active improves the performance of existing filtration systems.

## ⚗ PURIFICATION

Whole home active air purification using next generation technologies to neutralize indoor air pollutants such as odors and VOCs.

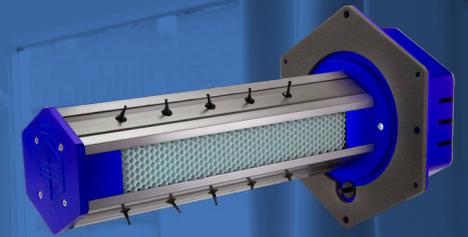

## ☀ UV INACTIVATION

When professionally installed, UV-C light can inactivate specific, targeted bacteria where the UV-C light shines.<sup>1</sup>

WHOLE HOUSE AIR PURIFICATION

# WHY CLEAN AIR IN YOUR HOME IS IMPORTANT.

Our lives are not static. Neither is the air quality in our homes. It is always changing. Some hours, days, weeks, and months, our air is worse than others. Whether caused by cold or flu, cooking, cleaning, or a remodel project, at some point, **exposure to bad air could affect every occupant of our home.**

## ACTIVE ACTIVE MATRIX AIR PURIFICATION

UV-C LIGHT AND IONIZATION  
PROVIDE A COMPREHENSIVE  
IAQ SOLUTION.

### DUST FREE® ACTIVE ALLERGEN REDUCTION

- 1 Viruses<sup>1</sup>
- 2 Bacteria<sup>1</sup>
- 3 Dust, Mold, and Pollen
- 4 Cooking Odors
- 5 Tobacco Smoke
- 6 Volatile Organic Compounds
- 7 Pet Allergens

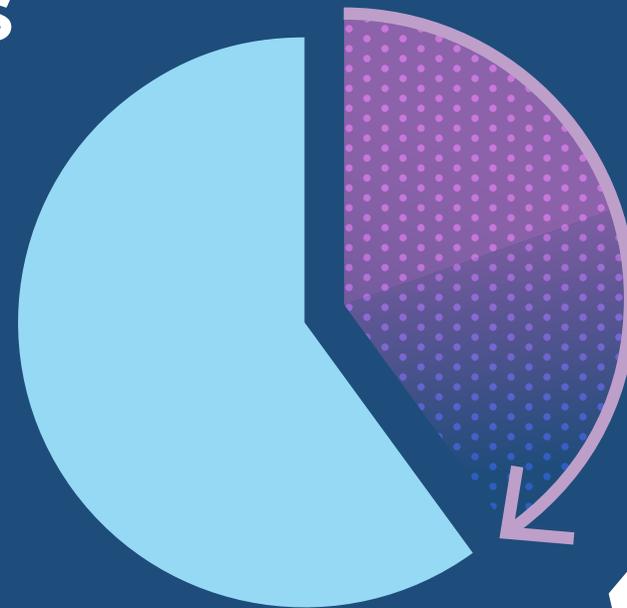

<sup>1</sup> MS2 virus and Staphylococcus epidermis bacteria.

## POLLUTION LEVELS

A 2018 American Lung Association study says that 141.1 million Americans live in areas with high levels of particulate in the air. Meaning that 2 out of every 5 Americans are breathing polluted air.

But the study focuses on outdoor air and particulate levels only. The study does not include indoor pollutants which regularly infiltrate our homes.

**When you add chemicals, bacteria, viruses, and other pollutants into the mix, that number of 2 in 5 Americans breathing bad air can potentially grow.**

# 40%

of Americans are breathing polluted air.

The Dust Free® Active Air Purifier is a compact, duct-mounted, air purifier that is effective at reducing dust, dander, VOC's, odors and other allergens, from the indoor air. Installed into the supply plenum of your HVAC system, the Dust Free® Active Air Purifier's UV light and ionization system effectively reduce pollutants.
