

FRESH-AIRE UV®

UV Lamp Recycling

Important!

UV Lamps contain mercury and must be disposed of properly!

Triatomic Environmental Product Recycling Program

Triatomic Environmental, manufacturer of Fresh-Aire UV products, announces our UV Lamp Recycling Program. Simply return the old lamps to us (they must be packaged for safe shipping) and we will recycle them properly. The cost to you is only \$3.95 per lamp.

For more information call **800-741-1195**

EPA: How to Establish a Recycling Program for Mercury-Containing Light Bulbs

Outlined below are steps that businesses can undertake to properly manage used universal waste lamps.

Step 1: Assess Your Facility – Assessing your facility is a key step to implementing a recycling program. In assessing your facility, the following questions should be answered: How many UV and/or fluorescent lamps are in the facility? Where are they located? How often do you change your UV and/or fluorescent lamps? How many UV and/or fluorescent lamps are you disposing of each month and year? How are you handling and storing the used lamps? Do all employees know what to do with a used UV and/or fluorescent lamp?

Step 2: Become Knowledgeable about State and Federal Requirements for Managing UV and/or Fluorescent Lamps – Consult your state's regulations for state-specific requirements for managing hazardous waste lamps, noting the specific requirements that pertain to the Universal Waste Rule. Lamp recyclers should be aware of state and federal requirements and will be able to provide assistance in this area.
