NEW PRODUCT BULLETIN

NYLOG BLUE 2 PACK

Part #: RT201BP

GASKET & THREAD SEALANT

Nylog Blue is an elastic fluid made from synthetic refrigeration grade compressor oil. Nylog Blue is fully miscible and compatible with all system refrigerants and oils. Gaskets coated with Nylog will never dry or become heat fixed to the surface. Threaded connections coated with Nylog will block high pressure leaks by forming a hydraulic seal. Nylog can be used an assembly lube when installing shaft seals, o-rings, schrader valves, ball valves, or other internal system components.

PORUDUCT INFORMATION AVAILABEL AT:
https://www.refrigtech.com/nylog-blue/

- Will not contaminate systems
- Seals flares and threaded connections
- Lubricates O-rings and gaskets
- Approved by OEM manufacturers

Benefits: Now sold in a 2-pack clamshell countertop and peg board display. Nylog Blue can be presented in a point-of-sale fashion much more appealing to the professional technician as well as providing the contractor with a reusable storage container to pack Nylog in after use preventing the product from getting on their tool bag, truck bins, digital meters, and service tools.
