

# QwikLug®

## QwikLug<sup>®</sup> Compressor Terminal Repair Kits

Mainstream's patented product, QwikLug®, easily attaches to damaged or corroded terminals. QwikLug® has colorcoded leads to connect to existing wiring. The outer connector housing is a nylon insulator, eliminating the potential for shorting. *It's that easy!* 

- Enables tight clean connections to damaged or corroded terminals
- Fits all standard compressor terminals
- Easily tightens from the front
- Optional set screws for tight installations
- Provides a durable brass connection, tested for more than 100,000 compressor starts
- Fully insulated brass connector
- Available with 10 AWG or 12 AWG leads in 2' or 4' lengths
- > 2' leads have been pre-stripped at the wire connection end
- 4' leads have fully insulated female connectors for connection directly to the contactor

## Finally... a Quick & Simple Method to Repair Compressor Terminals!

### **Directions for use:**

- 1. Clean the damaged or corroded terminals.
- 2. Push the QwikLug<sup>®</sup> connector onto the terminal.
- 3. Tighten from the front.
