Product
Ductless Drain Line

Purpose
The Asurity™ 16mm diameter, non-kinking drain line used for mini-split installations. For drainage of air conditioning condensation water (without pressure). These are non-insulated condensate drain hose for ductless applications. We recommend installing the ductless drain line inside of a line set cover.

Features: 230-DL16-S

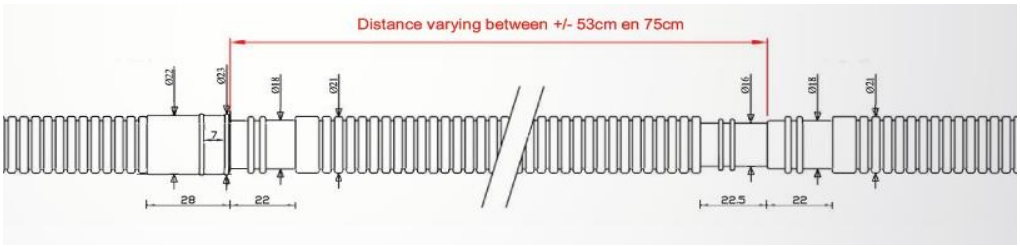

- The smooth internal surface minimizes trapped water that can promote biological growth, minimizing the possibility of blockages and foul odor formation.
- Non-kinking drain line with low resistance improving condensate flow.
- 16mm diameter non-insulated drain line specifically designed for mini-split installation.
- Smooth Bore reduces trapped water pockets and maximizes condensate flow.
- Resists clogging and foul odor production
- UV Resistance resists deterioration from sunlight
- Drain Line meets UL 94 V-0

Features: 230-DL16

- Connects to 16mm, 18mm and 20mm diameter air conditioning condensation outlet adapters.
- Furnished with cut marks every 3.28 feet
- Made of UV Stabilized Low Density Polyethylene

Specifications: 230-DL16

General Characteristics

Part Number	Description	Length (ft)	ID (in)	UPC	Order Multiple
230-DL16	Mini-Split Drain Line	160	5/8	0095247127474	1
230-DL16-20	Mini-Split Drain Line	20	5/8	0095247149599	1
230-DL16-S	Mini-Split Smooth Drain Line	98	5/8	0095247196579	1
