

Product

High Rise Pan™

Purpose

The High Rise Pan™ is an innovative new plastic drain pan design which allows placement of an air handler 2-3/4" above the outside lip of the pan and a total of 5" of lift from the bottom of the pan.

Features

The High Rise Pan™ is constructed of a heavy duty ABS plastic material that is 80% thicker than standard pans and is designed with a bevy of well positioned reinforcements and risers. These reinforcements and risers allow for a strong, durable and versatile drain pan that can hold a wide variety of air handlers 5" higher than normal pans. Molded-in depressions in the risers make a perfect mounting point for 2x2 anti-vibration pads, which means quiet operation. The one-piece construction makes the pan nestable with other pans and with rolled edges its superior in its resistance to splitting, leaking, cracking, or rusting.

Included Equipment

- CC-1 float switch
- 6 E.V.A. Anti-Vibration Pads
- 1 3/4" PVC male adapter

Specifications

Nominal Thickness: 0.125"
Material: ABS
Rise: 5"

Heat distortion temperature 199°F @ 264 psi
ASTM 648 211°F @ 66 psi

Flexural strength: 9,300 psi
ASTM 790

Tensile strength: 5,300 psi
ASTM 638

Load support: 350 lb*

**All loads must be evenly distributed.*
