

Heat Pump Riser

Product	Heat Pump Riser
Application	Heat pumps and air handlers
Indoor/Outdoor Use	Indoor or outdoor
Purpose	Heat Pump Risers provide a sturdy and stable solution for adding elevation to a heat pump or air handler.
Composition	High-pressure injection molded polypropylene - medium gray or black color. Butyl mastic on the top and bottom guarantees no slipping.
Advantages	The one-piece or two-piece, heavy duty plastic unit is manufactured in three heights - 3", 6" and 12" with an optional 4" extension. Thick wall sections and generous reinforcement are employed in the most effective areas, yielding a strong yet lightweight structure. The nestable design allows maximum shipping and storage density.
Maximum Uniform Load	A HPR-3 or HPR-6 Heat Pump Riser can handle a uniform load of 2000 pounds with no failure.
Maximum Point Load	A HPR-3 or HPR-6 Heat Pump Riser can handle a point load, applied to one square inch area in center of footpad recess on top of single HPR, of less than 560 pounds with no failure.
Directions	Simply peel the release liner from the mastic before placing the Heat Pump Riser and equipment.
